

8371

B1 13 wherein said second printed matter cannot be clearly resolved by a viewing  
14 person without magnification of the second printed matter; and  
15 wherein said first and second printed matter conveys identifying information.

Sub. 3

2 11. (Twice Amended) A system of tamper resistant identification documents  
3 comprising:  
4 a plurality of identification documents, each of said documents displaying  
5 information specific to a particular person;  
6 each of said documents comprising first printed matter rendered at a first location  
7 on said documents at a first scale enabling said first printed matter to be resolved by a  
8 viewing person without magnification; and second printed matter representing said first  
9 printed matter at a second location on said documents and at a second scale, said second  
10 scale being significantly smaller than said first scale, and wherein said information is  
11 represented in a second color determined to minimize contrast between said second color  
12 and said second location said second location on each card being spaced from said first  
13 location on each card and containing a graphical element whereby said printed matter is  
14 represented in at least two separate and distinct locations on each said card, wherein said  
15 second printed matter cannot be resolved by a viewing person without magnification of  
16 the second printed matter, and wherein said first printed matter of each card is specific to  
the particular person identified in each card.

Sub. 4

B3 1 21. (Twice Amended) A method of printing a document containing identifying  
2 information for a particular person comprising:  
3 providing a base card;  
4 printing information which is specific to the particular person identified on said  
5 base card at a first location and at a first scale enabling said printed information to be  
6 resolved by a viewing person without magnification; and  
7 representing said information on said base card at a second location and at a  
8 second scale, said second scale being significantly smaller than said first scale, said  
9 second location spaced from said first location and containing a graphical element,  
10 whereby said information is represented in at least two separate and distinct locations on
